

Stratified Wire: thermo SE

Brass Core, CuZn Coating

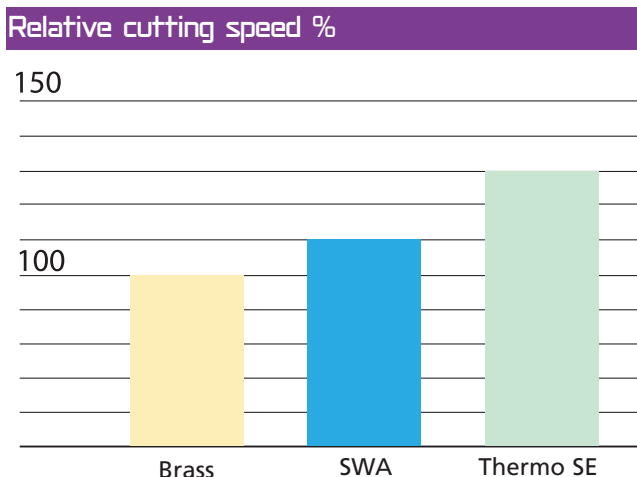

The new high performance wire, Thermo SE, is part of a new generation of economic EDM wires that THERMOCOMPACT has developed. For the first time, Thermo SE combines a very high level of performance (speed and precision) and realistic savings on wear items and maintenance of

wire EDM machines.

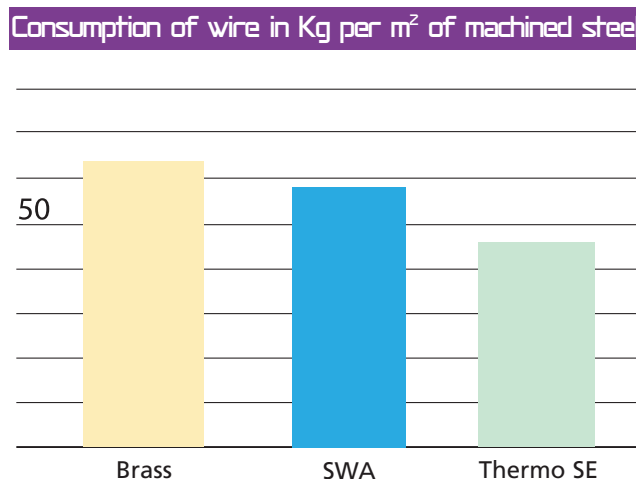

Thermo SE is suitable for all types of wire EDM machines.

- Very high speed cutting, up to 20% faster than standard coated wires
- Uses standard brass wire technologies
- Very good improvement of the surface finish on the workpiece during finishing
- Electric contact life extended up to 20%.
- Filter life increased up to 20%
- Reduction of wire speed and wire consumption possible during cutting of up to 20% less compared to standard wires
- Wire surface is extremely clean, reducing machine maintenance

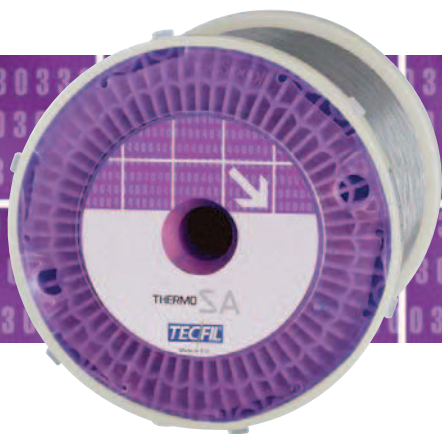

Characteristics	Thermo SE
Core	CuZn Alloy
Coating	CuZn
Tensile strength	750 N/mm ²
Yield strength	700 N/mm ²
Elongation	2 %
Conductibility	28 % IACS

Test performed on an AGIE WEDM machine, steel work piece, 50mm height
