

Coated Wire: thermo SA

Brass Core, Zinc Coating

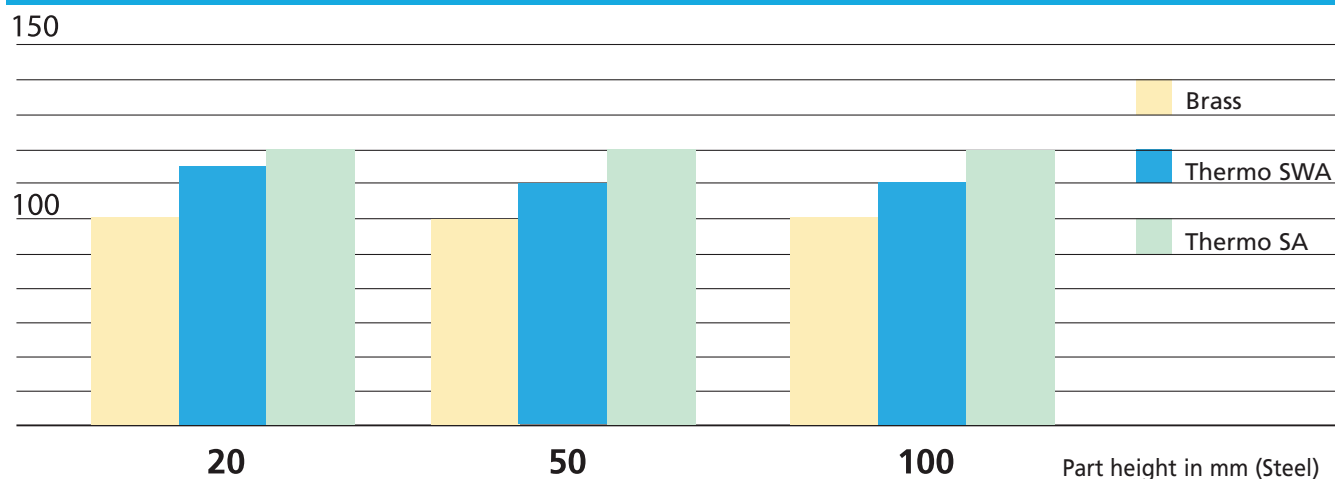

The new coated brass wire, Thermo SA, has been developed in response to a market demand for high quality and precision wire. It is particularly suitable for applications with special requirements for extremely fine precision cuts. The special coating ensures

a very clean finish along the cut surfaces as well as a high performance in terms of cutting speed.

- High precision in cutting
- Excellent surface finish - Ra 0.10µm
- Suitable for automatic threading
- Cutting speed up to 20% faster than brass wire
- Uses standard zinc coated technology
- Highly recommended for the latest generation of WEDM machines from Agie and Charmilles

Characteristics	Thermo SA
Core	CuZn 37
Coating	Special Alloy
Tensile strength	900 N/mm ²
Yield strength	800 N/mm ²
Elongation	2%
Conductibility	21%

Relative cutting speed [%]
