

Stratified Wire: thermo TEX

Copper Core, CuZn Coating

The new high performance wire, Thermo TEX, is part of a new generation of economic EDM wires that THERMOCOMPACT has developed. For the first time, Thermo TEX combines a very high level of performance (speed and precision) and realistic savings on wear items and maintenance of

wire EDM machines.

Thermo TEX is particularly suited for use with Charmilles Robofil wire EDM machines.

- Recommended sales price lower than SWX wire
- Very high speed cutting, up to 25% faster than standard coated wires
- Uses standard SWX wire technologies
- Very good improvement of the surface finish on the workpiece during finishing
- Electrical contact life extended up to 20%.
- Filter life increased up to 20%
- Reduction of wire speed and wire consumption possible during cutting of up to 20% less compared to standard wires
- Wire surface is extremely clean, reducing machine maintenance

VERY HIGH SPEED
& PRECISION

Characteristics	Thermo TEX
Core	Copper
Coating	CuZn
Tensile strength	450 N/mm ²
Yield strength	350 N/mm ²
Elongation	1 %
Conductibility	70 % IACS

Test performed on a Charmilles Robofil WEDM machine, steel workpiece, 50mm height

Stratified Wire: thermo TEX
